

Controlled Motion Dynamics Inc.
PO Box 3832, Omaha, NE 68103
345 South 26th Street, Omaha, NE 68131
(402) 346-6480 (402) 422-0430
FAX: (402) 345-1567 FAX: (413) 638-3495
Toll-Free: 800-228-9750

Examples of Industries Served

- Centrifuge Manufacturers
- Pellet Mill Manufacturers
- Heavy Machine Manufacturers
- Irrigation Equipment Manufacturers
- Tool and Die Manufacturers
- Food Service Companies
- Medical Equipment Manufacturers
- Medical Researchers

Case Study

Opportunity:

Customer was looking to improve the testing method for pressure testing spray bottle pick up tubes using water.

Solution:

CMDI provided an 80/20 frame designed in house, a diaphragm pump, and all pneumatic controls.

1. Customer places their test unit in the sink. Using the pneumatic controls, the operator can turn the pump on/off, adjust pressure and verify that they are getting the correct pressure.

2. The water used is in a closed loop system to reduce the amount of water usage. The pump draws water from the tank and the sink drains back into the tank.

3. CMD added a dampener to the diaphragm pump to reduce the chugging that naturally occurs with this style of pump for a smooth consistent water flow.
